Approved by AICTE, Accredited by NAAC &Affiliated to JNTUK - Kakinada.

opp. Katuri Medical College, Yanamadala, Andhra Pradesh 522019

Summary Report

Artificial Intelligence and ML Engineer
Blackbucks Long Term Internship 2026

KITS AKSHAR INSTITUTE OF TECHNOLOGY
Approved by AICTE, Accredited by NAAC &Affiliated to JNTUK - Kakinada.
opp. Katuri Medical College, Yanamadala, Andhra Pradesh 522019

AN INTERNSHIP REPORT ON

Movie Recommendation System: NLP Based Recommender System

Submitted in partial fulfilment of the requirements to

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY KAKINADA

For the award of the degree

BACHELOR OF TECHNOLOGY

in

COMPUTER SCIENCE AND ENGINEERING

Submitted by

BIKKI.VISHNU VARDHAN **22JK1A0528**

Under the guidance of

K SRINIVAS REDDY

Assistant Professor Dept. of CSE

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING
KITS AKSHAR INSTITUTE OF TECHNOLOGY Affiliated To JNTUK
2022-2026

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

CERTIFICATE

This is to certify that this internship work titled "**Movie Recommendation System: NLP Based Recommender System**" is the Bonafide work of **B.VISHNU VARDHAN - 22JK1A0528** who carried out the work under supervision and submitted in the partial fulfillment of the requirements for the award of the degree of **Bachelor of Technology** in Computer Science & Engineering from **JNTUK** during the academic year 2022-2026.

BLACKBUCKS EDUCATION INTERNSHIPS 2026

Certificate of Completion

Certificate Id: **BBEDAPSCHE2026LT03920**

This is to certify that **Mr/Ms Bikki Vishnu Vardhan**, bearing Reg. No: **22JK1A0528**, from **KITS AKSHAR Institute of Technology**, has successfully completed a **16-week Long-Term Internship** in **Artificial Intelligence and ML Engineer** during the period **02nd December 2025 to 02nd April 2026.**

During the course of this internship, the candidate actively participated in the structured training sessions, practical assignments, and project-based learning activities designed to enhance industry-relevant skills and professional competencies.This internship program was conducted and **organized by Blackbucks Education Pvt. Ltd**., with the objective of providing practical exposure and hands-on experience aligned with current industry standards.

Place: Hyderabad

DECLARATION

We hereby inform that this main project entitled "**Movie Recommendation System: NLP Based Recommender System**" has been Carried out and submitted in partial fulfillment for the award to the degree of **Bachelor of Technology in Computer Science and Engineering** to Jawaharlal **Nehru Technological University Kakinada** under the guidance of **K SRINIVAS REDDY, Assistant Professor Dept. of CSE**, Dept. of Computer Science and Engineering. The work embodied in this project work is original and has not been submitted in part or full for any degree of this or any degree of any other university.

NAME	**:**	**BIKKI VISHNU VARDHAN**
ROLL NUMBER	**:**	**22JK1A0528**
DEPARTMENT	**:**	**COMPUTER SCIENCE AND ENGINEERING**
COLLEGE	**:**	**KITS AKSHAR INSTITUTE OF TECHNOLOGY**

ACKNOWLEDGEMENT

We would like to express our profound gratitude towards "**K SRINIVAS REDDY**", **Assistant Professor Dept. of CSE**, Department of **COMPUTER SCIENCE AND ENGINEERING, who** played a supervisory role to utmost perfection, enabled us to seek through our B.Tech internship and for guiding as an internal guide methodically and meticulously.

We are highly indebted to **Dr. GURU KESAVA DAS** **M.E (CSE), Ph.D. (CSE).**, **Head of the Department**, Computer Science and Engineering for providing us all the necessary support.

We are very much thankful to the college management for their continuous support and facilities provided.

We render our deep sense of gratitude to **Dr. K. RAMA KOTAIAH** **Principal,** for permitting us to carry out our internship works. We would like to express our sincere thanks to the Computer Science and Engineering staff for lending us their time to help us and complete the work successfully.

We would also like to thank our staff, parents and friends for their enduring encouragement and assistance whenever required.

Internship Overview:

Total Duration: 4Months (16 Weeks)

Total Learning Hours: Up to 240 Hours

Delivery Mode: Hybrid (Live + Recorded + Platform-based Learning)

Learning Platform: Blackbucks TaPTaP LMS

Project : Individual Project selection

Communication Mode: Domain-wise WhatsApp Groups

Program Objectives

The **Blackbucks Skill Internship Program 2026** aims to:

1. Develop **industry-ready skills** through structured, domain-specific training.
2. Provide **hands-on project experience** and mentor-driven guidance.
3. Strengthen **placement and employability readiness** through mock tests and continuous evaluation.
4. Offer exposure to **modern technologies and workflows** in real-world problemsolving.
5. Enable participants to graduate with a **project portfolio and certification** validating 240 hours of learning.

Program Structure

Pre-Program Phase (Week 1– 4)

Objective: Prepare interns for core learning and professional readiness.

Activities:

- **Daily Placement & Employability Practice Papers ● Pre-Assessment Test Prerequisite Courses & Recorded Content**
- **Orientation Session (2 Hours)** introducing mentors, LMS, and domains.

Foundation Phase (Week 5 – 6)

Objective: Introduce all to the selected domains through conceptual and overview sessions.

Schedule:

- **Mon / Wed / Fri:** Basics of each domain
- **Tue/Thu/Sat:** Overview and domain introductions **Weekly Activities:**
- 1 Assessment (1 hr)
- 1 Assignment
- 1 Placement Test
- 1 Employability Test

Core Internship Phase (Week 7–12)

Objective: Strengthen technical and practical expertise.

Weekly Pattern:

- 3 Live Sessions (2 hrs each)
- 1 Assignment
- 2 Assessments
- 1 Employability Test

Recap & Review Phase (Week 13 – 14)

Objective: Revise all domain concepts and prepare for project work.

- Mentor-led recap sessions
- Domain-wise revision & short tests

Project Implementation Phase (Week 15)

Objective: Apply learning through a guided, mentor-supported project.

Details:

- 2 Mentor Support Sessions per week (6 total)
- Project divided into 5–6 steps (each step: 3 days)
- Weekly placement and employability tests continue

Final Phase (Week 16)

Objective: Assess final performance and close the internship.

- Grand Test – Part 01 & 02 (Total 5 Hours) ● Project Review & Certification Ceremony

About the Blackbucks

The Blackbucks: Pioneering Campus Success

The Blackbucks is India's premier **Campus Success Platform**, committed to transforming higher education and placement ecosystems. As a trusted partner of top **Higher Education Institutions (HEIs)**, Blackbucks provides a robust suite of technology-driven solutions designed to empower students through rigorous training, structured practice, and successful placement outcomes.

Vision: Empowering Students for a Brighter Tomorrow

At The Blackbucks, we believe in **leveraging technology to unlock the full potential** of every student. Our mission is to bridge the gap between academic learning and real-world careers by offering comprehensive support systems that align education with employability.

Key Offerings

- **TaPTaP Platform** – Advanced learning and placement tracking system
- **VPL Platform** - College domain wise labs
- **BBX Swift** – Personalized learning engine for upskilling and certification
- **University Certification Programs** – Job-linked career pathways integrated with higher education

Together, these tools provide a **360° learning and placement experience**, tailored for diverse academic backgrounds.

12 Years of Impact & Innovation

Founded in **2013**, The Blackbucks began with a revolutionary idea: *"Technology for Students."* Over the past decade, we've grown into a world-class technology company with a track record of innovation, impact, and measurable success in student outcomes.

Recognized Leaders in Post-Graduation Careers

Our **Post Graduation Career Programs**, run in collaboration with the **Government of Andhra Pradesh**, have been **awarded for seven consecutive years**, showcasing our excellence in job-linked education and guaranteed placement pathways. We take pride in offering cutting-edge training in:

- Software & Product Development
- Artificial Intelligence & Machine Learning
- Data Science & Emerging Technologies
- Cybersecurity, MBA, and Entrepreneurship Tracks **Why Choose The Blackbucks?**

- **10+ years of expertise** in student-centered ed-tech innovation
- **Guaranteed placement programs** across technical and management domains
- A growing network of **200+ partner colleges and 1000+ recruiters** ● Proven success with **tens of thousands of student placements**

Join Us: Where Learning Meets Opportunity

Whether you're a **student seeking career transformation**, an **educational institution aiming to boost placement performance**, or a **recruiter looking for top talent**, The Blackbucks is your destination for success.

Company Snapshot

- **Website:** www.theblackbucks.com

- **Industry:** Technology, Information & Internet
- **Headquarters:** Hyderabad, Telangana, India
- **Company Size:** 51–200 employees
- **Founded:** 2013
- **LinkedIn Presence:** 143+ professionals currently associated

Specialties

IT & Software | Product Development | Engineering | Electronics | AI/ML | Data Science | Emerging Technologies | Higher Education | Career Services | Entrepreneurship | Jobs & Placements

Artificial Intelligence and ML Engineer – 10 Module Syllabus

Module 1: AI & ML Foundations

- Introduction to Business Analytics & BI
- Data-Driven Decision Making
- KPIs & Business Metrics
- Analytics Use Cases Across Industries

Module 2: Mathematical & Statistical Foundations

- Math Foundations for Machine Learning
- Descriptive Statistics & Probability
- Correlation, Regression Basics
- Analytical Thinking for Business

Module 3: Data Types, Sources & Analytics Workflow

- Data Types & Data Sources
- Analytics Workflow
- ML Workflow Overview
- Data Understanding & Collection

Module 4: Python for Data Analytics

- Python for Analytics
- NumPy
- Pandas
- Matplotlib
- Exploratory Data Analysis (EDA)

Module 5: Data Preprocessing & Feature Engineering

- Data Cleaning
- Handling Missing Values & Outliers
- Data Transformation & Scaling
- Feature Engineering Techniques

Module 6: Machine Learning Fundamentals

- ML Concepts
- Regression & Classification Overview
- Model Evaluation Metrics

Module 7: Regression & Classification Models

- Linear, Ridge & Lasso Regression
- Classification Models

- Model Selection & Validation
- Business Use Cases

Module 8: Unsupervised Learning & Model Optimization

- Unsupervised Learning: K-Means Clustering & PCA
- Feature Engineering Techniques
- Dimensionality Reduction Concepts
- Model Evaluation Metrics
- Model Optimization & Performance Tuning

Module 9: Advanced Analytics & AI

- Neural Networks Fundamentals
- TensorFlow & Keras
- CNNs, RNNs, LSTM, GRU
- NLP & LLMs Deep Dive
- Reinforcement Learning
- Explainable AI (SHAP, LIME)

Module 10: Deployment, Project & Capstone

- Dashboard Deployment & Sharing
- End-to-End AI & ML Project
- Capstone Presentation

Pre-Program Phase- 01 (Week 01 – 04)

Monthly Summary Report – December 2025

Internship Duration Covered

Month: December 2025 – Early January 2026

Program: Blackbucks Long Term Internship (LT 2026)

Focus Areas: Pre-requisite Skill Building, Company-Based Evaluation, Employability Assessments

---

Overview of the Internship Activities

The Blackbucks Long Term Internship (LT 2026) is designed to prepare students for industry readiness through a structured approach involving **technical foundation strengthening**, **company-aligned mock assessments**, and **employability evaluations**.

During December 2025, the program focused on completing pending pre-requisite topics and periodically evaluating students' progress through mock tests and employability assessments.

Module 1: Pre-Requisites Learning (Skill Foundation Module)

Duration

- Conducted across **Weeks 01 to 04**
- Multiple days each week based on pending course requirements

Description

This module focused on strengthening students' **core technical and conceptual foundations** required for successful participation in the internship and future industry roles. Students continued learning pending syllabus topics aligned with their selected domain.

Key Learning Outcomes

- Completion of balance technical topics from the assigned course
- Improved conceptual clarity and problem-solving skills
- Readiness for company-level assessments and real-world tasks
- Reinforcement of fundamentals required for advanced internship activities

Mode

- Self-paced and guided learning
- Progress monitored through scheduled assessments

Module 2: Company-Based Mock Tests

Schedule

- **Mock Test 01:** 9th December 2025
- **Mock Test 02:** 16th December 2025
- **Mock Test 03:** 23rd December 2025
- **Mock Test 04:** 30th December 2025
- **Timing:** 6:00 PM – 11:00 PM

Description

Company-based mock tests were conducted to simulate **real corporate hiring assessments**. These tests were designed based on actual company recruitment patterns to familiarize students with industry expectations.

Key Objectives

- Evaluate technical, aptitude, and logical reasoning skills
- Prepare students for real placement and internship tests
- Improve time management and assessment handling skills
- Identify skill gaps and areas for improvement

Outcome

Students gained hands-on experience with company-style evaluations, enhancing their confidence and assessment readiness.

Module 3: Employability Assessments

Schedule

- **Assessment 01:** 13th December 2025 ● **Assessment 02:** 20th December 2025
- **Assessment 03:** 27th December 2025
- **Assessment 04:** 3rd January 2026
- **Timing:** 6:00 PM – 11:00 PM

Description

Employability assessments were conducted to measure students' overall **job-readiness**, beyond technical skills. These assessments focused on aptitude, analytical thinking, communication ability, and professional awareness.

Key Evaluation Areas

- Problem-solving and analytical ability
- Logical reasoning and aptitude skills
- Industry readiness and employability parameters
- Performance consistency across assessments

Outcome

The assessments provided a structured benchmark of student readiness and helped track progressive improvement throughout the internship period.

Overall Internship Outcomes (December 2025)

- Successful continuation and completion of pending pre-requisite learning modules
- Exposure to **four company-based mock tests** ● Participation in **four employability assessments**
- Enhanced technical competency and assessment confidence
- Improved industry alignment and placement preparedness

Conclusion

The December 2025 phase of the Blackbucks Long Term Internship (LT 2026) provided a structured and outcome-oriented learning experience. Through continuous learning, regular mock testing, and employability assessments, students demonstrated progressive improvement in both technical and professional competencies. This month served as a strong foundation for advanced internship activities and realworld industry engagement in subsequent phases.

Foundation Phase 02 (Week 05 – 06)

Blackbucks Long Term Internship (LT 2026)

Live Sessions Summary Report – Artificial Intelligence and ML Engineer

Period Covered: January 2026

Phase Overview

The Fundamental Phase focused on developing **core analytical foundations**, domain understanding, and initial placement readiness. This phase emphasized AI & ML concepts, Python programming, Machine Learning fundamentals, and early exposure to company-based assessments.

Week 05: AIML & Python Foundations

Duration: 5th January 2026 – 10th January 2026

Key Activities

- Internship onboarding and orientation
- Business Analytics fundamentals session
- Python basics for data analysis

- Session-wise assessments
- TCS NQT Placement Mock Test
- Employability Test – 01

Learning Focus

- Understanding Business Analytics concepts
- Role of data in business decision-making
- Python programming basics for analytics
- Familiarization with placement-style assessments

Week 05 Outcomes

- Clear understanding of analytics domain fundamentals
- Improved analytical thinking
- Initial benchmarking of technical and aptitude skills

Week 06: Machine Learning Fundamentals & Workflow

Duration: 12th January 2026 – 17th January 2026

Key Activities

- Machine Learning fundamentals session
- ML data and analytics workflow session
- Lesson plan-based learning and revisions
- Session-wise assessments

Learning Focus

- Core Machine Learning concepts
- Analytics workflow understanding
- Regression and classification overview

Week 06 Outcomes

- Conceptual clarity in ML fundamentals

- Ability to relate ML techniques to business analytics
- Improved problem-solving and analytical reasoning

Phase 03: Core Concept Phase (Week 07–12)

Duration: Week 03 onwards (February 2026)

Phase Overview

The Core Concept Phase focused on **advanced analytics concepts**, **business intelligence tools**, **hands-on practical exposure**, and **placement readiness**. This phase strengthened real-world application skills required for industry roles.

Week 07: Data Analytics Workflow & Placement Readiness

Duration: 19th January 2026 – 24th January 2026

Key Activities

- ML Data & Analytics Workflow session
- Regression & Classification concepts session
- Assessments
- Deloitte and Wipro Placement Mock Tests

Learning Focus

- Applied ML concepts
- End-to-end analytics workflow
- Placement-oriented skill practice

Week 07 Outcomes

- Better understanding of applied analytics concepts
- Enhanced readiness for corporate-level assessments

Week 08: Unsupervised Learning & Feature Engineering

Duration: 2nd February 2026 – 7th February 2026

Key Activities

- Assignment 2
- TCS NQT Placement Mock Test
- Session on Unsupervised Learning (K-Means, PCA)
- Session on Feature Engineering Techniques
- Assessments
- Employability Test

Learning Focus

- Fundamentals of Unsupervised Learning
- K-Means clustering and Principal Component Analysis (PCA)
- Feature selection and feature extraction methods
- Data preprocessing and transformation techniques

Week 08 Outcomes

- Ability to apply clustering and dimensionality reduction techniques
- Improved understanding of feature engineering strategies
- Enhanced analytical and model preparation skills
- Strengthened placement readiness through assessments

Week 09: Advanced Analytics & AI Concepts

Duration: 9th February 2026 – 14th February 2026

Key Activities

- Infosys Practice Mock Test
- DAX fundamentals session
- Neural Networks fundamentals session

- Assessments and Assignment 3
- Employability Test

Learning Focus

- Advanced analytics techniques
- Model Evaluation & Optimization
- Neural Networks and AI concepts

Week 09 Outcomes

- Conceptual understanding of AI-driven analytics
- Enhanced analytical depth and industry readiness

Week 10: Deep Learning Foundations & Model Implementation

Duration: 16th February 2026 – 21st February 2026

Key Activities

- Session on TensorFlow & Keras
- Assessment
- Placement Mock Test (3 Hours Duration)
- Session on Convolutional Neural Networks (CNNs)
- Assessment
- Employability Test & Assignment 4

Learning Focus

- Introduction to TensorFlow and Keras frameworks
- Building and training deep learning models
- Understanding Convolutional Neural Networks (CNNs)
- Model evaluation and performance analysis
- Placement-oriented aptitude and technical preparation

Week 10 Outcomes

- Practical exposure to deep learning frameworks
- Understanding of CNN architecture and applications
- Improved model-building confidence
- Enhanced readiness through mock and employability tests

Week 11: Advanced Deep Learning & NLP Concepts

Duration: 23rd February 2026 – 28th February 2026

Key Activities

- Session on RNNs, LSTM, and GRU
- Assessment
- Placement Mock Test (3 Hours Duration)
- Session on Natural Language Processing (NLP)
- Assessment
- Employability Test & Assignment 5

Learning Focus

- Understanding Recurrent Neural Networks (RNNs)
- LSTM and GRU architectures for sequence modeling
- Fundamentals of Natural Language Processing
- Text data preprocessing and sequence analysis
- Continuous assessment and placement preparation

Week 11 Outcomes

- Conceptual clarity in sequence modeling techniques
- Ability to apply RNN, LSTM, and GRU in real-world problems
- Foundational knowledge in NLP applications

- Strengthened analytical and technical competency

Week 12: Reinforcement Learning, Explainable AI & Model Deployment

Duration: 2nd March 2026 – 7th March 2026

Key Activities

- Session on Reinforcement Learning
- Assessment
- Placement Mock Test (3 Hours Duration)
- Session on Explainable AI (SHAP, LIME) & ML Model Deployment (Flask/FastAPI)
- Assessment
- Employability Test & Assignment 6

Learning Focus

- Fundamentals of Reinforcement Learning and decision-making models
- Understanding model interpretability using SHAP and LIME
- Basics of deploying machine learning models using Flask and FastAPI
- Evaluation of model performance and reliability
- Continuous assessment and placement preparation

Week 12 Outcomes

- Conceptual understanding of reinforcement learning techniques
- Ability to interpret machine learning model predictions
- Practical knowledge of deploying ML models as APIs
- Strengthened AI/ML development skills and industry readiness

Phase 04: Recap & Review Phase (Week 13 – 14)

Duration: Final Weeks (March 2026 onwards)

Phase Overview

The Recap & Review Phase was designed to consolidate all the knowledge and skills acquired throughout the program. This phase emphasized revision of key concepts, strengthening weak areas, and ensuring readiness for real-world challenges and placement opportunities.

Week 13: AI/ML Project Development & Implementation

Duration: 9th March 2026 – 14th March 2026

Key Activities

- Session on Project Phase 1
- Placement Mock Test (3 Hours Duration)
- Session on Project Phase 2
- Employability Test
- Project-based practice and implementation

Learning Focus

- Applying AI/ML concepts in real-world project development
- End-to-end model building and implementation
- Model evaluation and refinement
- Integrating learned techniques into practical solutions
- Continuous assessment and placement preparation

Week 13 Outcomes

- Hands-on experience in AI/ML project development
- Ability to implement complete ML workflows
- Improved problem-solving and model-building skills
- Enhanced confidence and industry readiness

Week 14: AI/ML Project Development & Final Implementation

Duration: 16th March 2026 – 21st March 2026

Key Activities

- Employability Test

- Placement Mock Test (3 Hours Duration)
- Session on Project Phase 3 ● Session on Project Phase 4
- Assignment 5

Learning Focus

- Continued development of AI/ML project
- Model refinement and optimization
- Integration of multiple ML techniques
- Project documentation and finalization
- Placement-oriented assessment practice

Week 14 Outcomes

- Ability to complete end-to-end AI/ML project implementation
- Improved model optimization and evaluation skills
- Practical experience in integrating AI/ML concepts
- Enhanced confidence and readiness for industry roles

Phase 05: Project Implementation Phase (Week 15)

Duration: Mid March 2026 onwards

Phase Overview

The Project Implementation Phase focused on applying all the learned concepts into real-world scenarios through end-to-end projects. This phase emphasized hands-on experience, problemsolving, and practical implementation of analytics and business intelligence skills.

Week 15: AI/ML Project Finalization & Presentation

Duration: 23rd March 2026 – 28th March 2026

Key Activities

- Employability Test
- Placement Mock Test (3 Hours Duration)
- Session on Project Review & Optimization
- Session on Project Presentation & Feedback
- Final Assignment Submission

Learning Focus

- Final optimization and fine-tuning of ML models
- Preparing project reports and documentation
- Model evaluation and performance comparison
- Presentation of project outcomes and insights
- Strengthening communication and interview readiness

Week 15 Outcomes

- Ability to finalize and present AI/ML projects effectively
- Improved skills in model evaluation and result interpretation
- Enhanced documentation and presentation abilities
- Increased confidence for technical interviews and industry roles

---

Phase 06: Final Phase (Week 16)

Duration: Week 16 (March 2026 – Ending Phase)

Phase Overview

The Final Phase focused on completing all documentation and formal submissions. This phase ensured proper presentation of work done throughout the internship and successful program completion.

Key Focus Areas

- Final project report preparation and submission
- Documentation of all phases and learnings
- Portfolio and resume finalization
- Submission of required internship deliverables
- Feedback and evaluation process

Outcome

Students successfully compiled and submitted their work, marking the completion of the internship with a professional and well-documented portfolio.

Overall Phase-Wise & Week-Wise Outcomes

- Structured learning progression from fundamentals to advanced concepts
- Continuous assessment and skill benchmarking
- Hands-on exposure to Python, AI and ML
- Strong placement-oriented preparation
- Improved confidence and professional readiness

---

Conclusion

The phase-wise structure of the **Blackbucks Long Term Internship 2026 – Artificial Intelligence and ML Engineer** ensured systematic skill development. From the **Fundamental Phase (Phase 02)** to the **Core Concept Phase (Phase 03)**, students built strong analytical foundations and practical expertise.

The **Recap & Review Phase (Phase 04)** strengthened understanding through revision and interview preparation, while the **Project Implementation Phase (Phase 05)** provided hands-on experience with real-world projects, ensuring complete industry readiness.
